

CUSHION CARE

Storage

- Store the cushions in a cool, dark and dry place
- The cushions can tolerate the influences of the sunlight quite well. If, however, the cushions are exposed to bright sunlight for a long time, a difference in colour may occur.

Maintenance

- Always adhere to the washing instructions mentioned on the label
- Use a liquid detergent suitable for fine textiles
- Never use a detergent containing bleach
- Washing by hand is preferable
- Never leave the cushions, that are to be washed, in water with a detergent for too long. Rinse the cushions properly.
- Let cushions dry inside out.
