

SUNBRELLA CARE

Keeping Sunbrella Fabric Looking its best is simple and easy.

Prepare a solution of one fourth cup mild soap per gallon of lukewarm water. Use a soft bristle brush to clean, allowing the cleaning solution to soak into the fabric. Rinse thoroughly to remove all soap residue and allow fabric to air dry.

Mold and mildew stains

Sunbrella fabrics do not promote mildew growth, however, mildew may grow on dirt and other foreign substances if not removed from the fabric. To remove mold or mildew:

- Prepare a solution of 1 cup of bleach and one fourth cup mild soap per gallon of water.
- Spray on entire area and allow to soak into the fabric for 15 minutes.
- Clean entire surface area with a sponge, clean towel or very soft bristle brush.
- Rinse thoroughly to remove all soap residue.
- Air dry.

For severe mold/mildew growth, bleach quantities may be increased. It is best to clean the entire surface area of the fabric to avoid water rings and stains. Always rinse thoroughly. Bleach won't harm Sunbrella fabric, but it could damage clothing if not rinsed away. Sunbrella fabric air dries quickly. Machine drying is unnecessary and high heat may damage the fabric.
